EDUCATION

University of Pennsylvania

M.S. in Engineering in Artificial Intelligence

Philadelphia, PA

Aug. 2026 – Present

- GPA: 4.00

University of California, Irvine

B.S. in Computer Science

Irvine, CA

Completed June 2026

- **Relevant Coursework:** Data Structures, Algorithms, Software Engineering, Databases, Computer Networks, AI, HCI, etc.

EXPERIENCE

Software Developer

American Verification Processing Solutions

July 2026 – Present

Canoga Park, CA

- Developed and deployed software that transfers merchant batch and chargeback data from **10+ banks** into IRIS CRM
- Built bank-specific parsing, validation, preview, and submission workflows for merchant transaction and dispute data
- Managed company websites, shipped production updates, and integrated AI tools into internal business workflows
- Investigated cPanel logs and hardened web systems against bot traffic, spam attacks, and suspicious access attempts

Software Engineer

Bizskip (Unpaid Startup)

Feb. 2026 – May 2026

Irvine, CA

- Developed an application for joining multiple local business waitlists and discovering nearby services
- Built React/Next.js workflows for **70+** providers, including search, availability, waitlists, listings, and dashboards
- Integrated Google Places API and Twilio SMS for business discovery and waitlist notifications to **200+** users

Research Computing Assistant

Caltech

July 2024 – Sept. 2024

Pasadena, CA

- Resolved **20+** CMS and infrastructure issues while supporting research systems and data center operations
- Maintained **50+** research IT systems and supported reliable communication across research operations
- Installed and configured **15+** servers and maintained Ubuntu/Python environments for technical research work

Data Structures & Linear Algebra Tutor

Learning Center (GCC)

Aug. 2022 – July 2024

Glendale, CA

- Tutored Linear Algebra, Discrete Mathematics, Data Structures, and Probability, with **80%** earning A grades
- Created custom handouts, practice quizzes, and study materials tailored to individual student needs

PROJECTS

BladeForge | Open-Source Synthetic Data Generation

- Built an open-source synthetic data tool for creating customizable 3D environments and AI training datasets
- Added controls for custom models, lighting, weather, camera angles, and environment configuration
- Implemented part-level defect mapping for cracks, scratches, rust, ice buildup, coating loss, dents, and erosion

LiveLectureAI | Next.js, TypeScript, Google GenAI Live API, TTS

- Built a live note-taking app that converts lectures into structured notes and summaries with **95% accuracy**
- Synchronized slides, transcription, voice assistance, and timestamp navigation through **2-hour** recordings

Quant Visualizer | Next.js, TypeScript, FastAPI, Python, Plotly.js

- Built a pairs-trading platform processing **20+ years** of stock data with interactive Plotly.js visualizations
- Implemented correlation, z-scores, backtesting, 3D distributions, Excel reporting, and an AI analysis assistant

TECHNICAL SKILLS

Languages: C, C++, Python, Java, R, SQL, JavaScript/TypeScript, HTML/CSS

Frameworks/Libraries: React.js, Next.js, FastAPI, Flask, Tailwind CSS

Cloud/Infrastructure: AWS EC2, DigitalOcean, Docker, Vercel, Supabase, Google Cloud APIs

Databases & Tools: MySQL, PostgreSQL, Git, GitHub, Linux/Unix, JupyterHub, VS Code, PyCharm, WordPress, Figma
